Holidays

All people feel happy during holidays. A holiday is the time when we are free from work. It helps us refresh our bodies and minds. We can relax, have fun and rest during it. It helps us break our daily routine. The most important thing is that it helps us visit new places and meet new people.

People spend their holidays in different ways. Some travel abroad to visit nice places. Others prefer to go to the sea and enjoy swimming. They also can relax on the beach. Some like to spend it at home with their families. Others enjoy being alone during it. Really, a holiday is a very important time in which we can do all what we like.
