www.almanahj.com

Puncture injury

- ▶ What is a puncture injury?

Care for a puncture injury

- ▶ Make sure the scene is safe for you.
- ▶ Phone the emergency services. Get the first aid kit and the AED.
- ▶ Wear PPE when dealing with blood. Try to stop any bleeding by applying pressure if the object is not still in the body.
- ▶ If the object is stuck in the body, leave it there until the emergency services arrive. Do not try to remove it.
